INTRODUCTION

RoboYuwa is a youth-led organization committed to empowering young people through technology, innovation, and community service. As part of our social responsibility initiative, we are launching Project Prayash, a community development program aimed at improving educational facilities and promoting basic electrical and electronics awareness in rural areas of Nepal.

The project seeks to combine technical education with community service by engaging volunteers in infrastructure improvement and awareness activities that directly benefit local schools and communities.

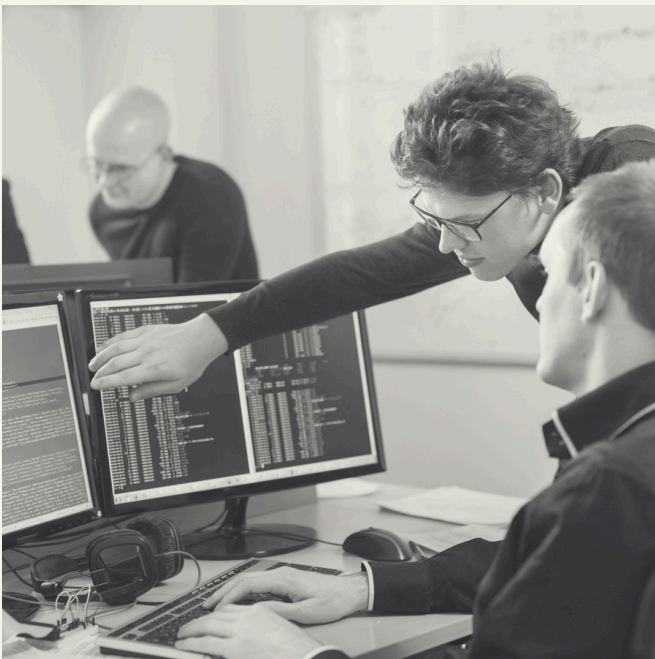

VISIONS

To contribute to the sustainable development of rural communities in Nepal through education, technology, and youth volunteerism.

OBJECTIVES

- Provide basic daily use electrical and electronics knowledge to school students.
- Improve school and community infrastructure.
- Construct or renovate playgrounds and community structures where feasible.
- Paint and beautify schools and public spaces.
- Promote volunteerism and community participation.

ACTIVITIES PLANNED

Technical Workshop

Basic electrical & electronics related training for solving daily life problems.

Human Right Awareness Workshop

Basic awareness program regarding human rights and social awareness for school students.

Electrical Safety Awareness Workshop

Basic awareness program regarding interaction with electricity.

Structural Development

Basic playground development, school wall painting and pavilion for local community.

Cyber Security Awareness Workshop

Basic awareness program regarding cyber security and online privacy.

Cyber Security Awareness Workshop

Playground Development

EXPECTED OUTCOMES

Outcome
Increased awareness of electrical safety and basic electronics.
Improved educational environment.
Enhanced community infrastructure.
Active participation of local youth and residents.
Strong collaboration between the local government and youth volunteers.

SUPPORT REQUESTED

RoboYuwa respectfully requests the Municipality/Ward Office to support Project Prayash through one or more of the following:

Approval

Recommendation and approval to conduct the project.

1

2

School and Community Group

Coordination with local schools and community groups.

3

Accommodation

Accommodation for volunteers to stay for project duration

4

Food (if possible)

Food for volunteers if possible

SUPPORT REQUESTED

Community Space

Space for developing a pavilion and play grounds

6

7

Workshop Space

Workshop Space for community awareness programs

8

Local Coordination

Person to easily communicate with for any kind of local assistance and guidance

9

Certificates

Valid municipality recognized certificate for Volunteers, Students and RoboYuwa

PREVIOUS ACTIVITIES

Workshop

- Conducted school student friendly workshops in kathmandu and Dhulikhel.

Competitions

- Represented Nepal in “Technoxian World Robotics Championship” held in Noida Stadium India.
- Participated in various national level competitions.

Event

- Successfully organized innovative event “RADAR 26” for youth development.

CONCLUSION

Project Prayash is a collaborative initiative that aims to create a meaningful and lasting impact through education, community development, and youth engagement. We sincerely request the Municipality/Ward Office to collaborate with RoboYuwa in implementing this initiative for the benefit of the local community.

We look forward to your positive response and the opportunity to work together for sustainable rural development.
